Mohamed Eslam

Full-Stack Software Engineer

📞 01280024800 mohamedeslam0419@gmail.com Portfolio GitHub NPM LinkedIn 📍 Cairo, Egypt

SUMMARY

Full-Stack Software Engineer with a strong frontend background, specializing in building scalable, high-performance web applications using Next.js, React, TypeScript, and Laravel. Currently shipping the Agent Hub AI voice-agent platform, Safha document products, and standalone microservices (multi-tenant OCR extraction, geospatial, AI scraping engine) at Velents, from frontend dashboards through API architecture and queues to signed webhooks. Adept at leveraging AI-assisted development tools like Claude Code to rapidly architect and implement robust backend solutions.

SKILLS

JavaScript | TypeScript | HTML / CSS / Sass | Vue.js / Nuxt 4 | React.js / Next.js | Laravel / PHP | Tailwind CSS v4 | Bootstrap 5 | shadcn/ui | TanStack / Pinia / Zustand | Drizzle ORM | PostgreSQL / Redis | Typesense / PostGIS | FastAPI / Python | NestJS / Prisma | GitOps (ArgoCD / Helm) | AI SDK / Gemini | Playwright / Puppeteer | REST APIs / Swagger | Docker / CI/CD | NPM Package Development | AI-Assisted Development (Claude Code)

EXPERIENCE

Velents.ai

01/2026 – Present

Full-Stack Engineer · Full Time · Remote

Riyadh, Saudi Arabia

- Shipped full-stack production features across Velents' product suite — Agent Hub (AI voice-agent platform), Safha Archive, Safha AI, and the feasibility-study system — in Next.js 16 / Laravel 13 monorepos.
- Architected standalone microservices from the ground up: a multi-tenant OCR extraction service (Laravel 13, Horizon queues, signed webhooks), a PostGIS geospatial roads service, and an AI scraping engine built on FastAPI with async job workers.
- Built the Automation Hub Playwright test-orchestration platform (NestJS, Prisma, PostgreSQL, BullMQ) and the company-wide Playwright E2E suites for Agent Hub and the ATS.
- Contributed to GitOps infrastructure (ArgoCD, Helm) including the AWS EKS → Azure AKS migration and an S3 → Azure Blob sync tool.
- Accelerated delivery with AI-assisted development (Claude Code) and authored the company's internal Claude Code skills catalog.

Amar Benaa

04/2025 – Present

Front-End Engineer · Part Time · Freelance

Riyadh, Saudi Arabia

Delivering ERP frontend solutions for digital transformation.

ATW

07/2024 – 01/2026

Software Engineer · Full Time · On Site

El-Mohandsin, Cairo, Egypt

- Developed dynamic, mobile-first user interfaces using Nuxt.js, Vue, and Tailwind CSS.
- Optimized application performance and ensured cross-browser compatibility.
- Collaborated closely with designers and backend engineers to deliver scalable, user-friendly features.

PROJECTS

AI Scraping Engine

10/2026 – Present

Microservice + Internal Dev Console

- Schema-driven scraping service ("link to ready-to-import data"): async jobs over REST with a probing → awaiting-approval → scraping → upload lifecycle, delivered via HMAC-signed webhooks.
- FastAPI + SQLAlchemy async (Postgres) with Taskiq/Redis workers and Playwright headless Chromium; per-client API keys, schemas, and webhooks with no cross-client data sharing.
- Internal React 19 dev console: submit jobs, review/approve proposed field mappings, preview artifacts, and track per-profile LLM cost and per-domain learned recipes.

`Python 3.12` `FastAPI` `SQLAlchemy async` `PostgreSQL` `Taskiq` `Redis` `Playwright` `React 19` `TypeScript` `Tailwind CSS v4` `S3 / Azure Blob` `Prometheus`

Feasibility Study System

07/2026 – Present

Web Application · Arabic-first (RTL) · Monorepo (Next.js & Laravel)

- Next.js 16 frontend for Saudi real-estate staff: capture a land plot's location, draw and measure boundaries on a map, and review a ranked summary of nearby landmarks and feasibility signals.
- Laravel 13 API with Passport auth, package-by-feature modules, and PostGIS-powered geospatial queries.
- AR/EN i18n with full RTL support via next-intl.

`Next.js 16` `React 19` `Laravel 13` `PHP 8.3` `TypeScript` `PostGIS` `next-intl` `Tailwind CSS v4` `TanStack Query` `Zustand` `Playwright` `Bun`

Automation Hub

06/2026 – Present

Internal Platform · Playwright Test Orchestration

- Platform to register test repositories, queue and execute runs on Docker-based Playwright runners, stream live logs and results, and surface analytics and tagging back to the team.
- NestJS 12 + Prisma 7 (PostgreSQL) + BullMQ backend; Next.js 16 + React 19 frontend with EN/AR i18n.
- Optional MCP server exposing runs and analytics to AI agents; Vitest unit layer across the backend.

`NestJS` `Prisma` `PostgreSQL` `BullMQ` `Redis` `Next.js 16` `React 19` `Playwright` `Vitest` `MCP`

Safha Archive

02/2026 – Present

Web Application · Monorepo (Next.js & Laravel)

- Developed Laravel backend API with Passport auth, using Claude Code for rapid implementation.
- Built frontend with Next.js 16, React 19, and TypeScript using shadcn/ui.
- Integrated Typesense for system-wide search and Gemini for semantic embeddings.
- Managed state via TanStack Query and Zustand.

Next.js 16 · Laravel 13 · PHP 8.2+ · Tailwind CSS v4 · Claude Code · Typesense · Gemini · TanStack Query · Zustand · React 19 · TypeScript · shadcn/ui

SAFHA – AI-Powered Document & Invoice Management System

01/2026 – Present

Web Application · Multi-Tenant ERP

- Built scalable Next.js frontend with multi-tenant architecture and RBAC.
- Developed admin dashboards and automated document processing workflows (upload, AI extraction, validation).
- Created an advanced PDF review experience with highlighted OCR fields and rule-based validation.
- Implemented AR/EN i18n with full RTL support via next-intl.
- Integrated external APIs including WhatsApp, Odoo, Qoyod, and Daftra.
- Ensured quality through comprehensive Playwright E2E tests and CI-ready setups.

Next.js 16 · Laravel 10 · PHP 8.1+ · React 19 · TypeScript · Tailwind CSS v4 · shadcn/ui · JWT Auth · React Hook Form · Zod · Playwright · Swagger

AI-Powered Penetration Tester

10/2025 – 01/2026

Website · Admin Panel

- Built an AI security dashboard with Nuxt, Vue, and Tailwind CSS.
- Implemented autonomous AI pentesting workflows with real-time scan updates via SSE.
- Developed an AI chat assistant for interactive security analysis.
- Integrated enterprise-grade security, OAuth, and advanced vulnerability intelligence.
- Utilized PostgreSQL with Drizzle ORM and Redis for caching, queuing, and optimization.

Nuxt 4 · Vue 3 · TypeScript · Tailwind CSS v4 · AI SDK · @eslamdevui/ui · PostgreSQL · Drizzle ORM · Redis · Puppeteer · Zod

EAPD – Egyptian Agency of Partnership for Development

07/2025 – 01/2026

Website · Admin Panel

- Developed the frontend with Nuxt 4 and the backend with Laravel, featuring dynamic content and interactive data visualization.
- Implemented a responsive, modern UI using a custom component library (@eslamdevui/ui) with smooth animations.

Nuxt 4 · Laravel · Vue 3 · TypeScript · @eslamdevui/ui · Tailwind CSS v4 · Bootstrap 5 · Pinia · Chart.js · DataTables

Expert System – Main Portal · POS App · Analytics App

01/2025 – 07/2025

Multi-portal system · POS App · Analytics App

- Developed Seller Portal (POS) and Analytics Portal using Vue.js and modular design patterns (HMVC, SOA).
- Integrated e-commerce APIs, Messaging, and HR modules using Domain-Driven Design (DDD).

Vue 3 · Laravel · TypeScript · Tailwind CSS · Bootstrap 5 · Pinia · Chart.js · Vuelidate · Livewire

EDUCATION

Cairo University

09/2019 – 09/2023

B.S. Computers and Artificial Intelligence · Cairo, Egypt

Arabic — Native English — Intermediate

OPEN SOURCE CONTRIBUTIONS

`Arqim — Security Report`

Security Research

Reported a security vulnerability in the Arqim platform and coordinated its remediation through GitLab's confidential vulnerability reporting workflow.

`@eslamdevui/ui`

NPM Package

A fully accessible UI component library for Vue & Nuxt based on Tailwind CSS.

`vue-directives-kit`

NPM Package

A Vue.js directives utility package to enhance development efficiency.

`vercel/next.js #93757`

Bug Report

Identified and reported a critical Next.js bug where a 0-byte file in `.next/cache/images/` permanently poisons the disk-LRU singleton, breaking image optimization for the entire process lifetime. Provided root-cause analysis across 3 source files and 4 suggested fixes.
